EDUCATION

Vignan Institute of Technology and Science

B.Tech CSE

CGPA: 9.00

2023 - 2027

Narayana Junior College

Mathematics, Physics & Chemistry

CGPA: 9.1

2021 - 2023

PROFESSIONAL SUMMARY

Computer Science undergraduate (B.Tech, CGPA 9.0) with research and industry experience in machine learning, data analysis, and statistical modeling. Experienced in building predictive models, analyzing datasets, and deriving actionable insights using Python, R, SQL, and XGBoost. Currently conducting adversarial machine learning research at NIT Warangal. Passionate about applying data science and AI techniques to solve real-world problems.

WORK EXPERIENCE

Machine Learning Research Intern – National Institute of Technology (NIT) Warangal

March 2026 – Present

- Researching adversarial machine learning techniques to improve model robustness against data poisoning and evasion attacks.
- Analyzing model behavior under adversarial conditions using statistical methods and controlled experiments.
- Applying causal inference frameworks to identify confounding variables and improve predictive model reliability.
- Reviewing academic literature on adversarial robustness, anomaly detection, and causal learning to inform research direction.

Software Development Intern - Wissen Infotech Pvt. Ltd., Hyderabad

May 2025

- Automated cross-database data migration across MySQL, PostgreSQL, and Oracle with data validation and integrity checks throughout the pipeline.
- Developed a backend database system with structured CRUD operations and query optimization using PostgreSQL.
- Wrote structured logs and error reports to monitor data pipeline performance and ensure accuracy.

PROJECTS

Interactive ML Dashboard for Productivity Analysis (R, Shiny, XGBoost)

[Git link](#)

- Built an end-to-end machine learning application enabling model training, hyperparameter tuning, and real-time prediction on tabular data.
- Achieved ~90% classification accuracy using XGBoost; performed feature importance analysis to identify key productivity drivers.
- Created interactive data visualizations in R Shiny to communicate screen time impact insights to non-technical stakeholders.

AI Study Planner (Flask)

[Git link](#)

- Developed an AI-powered application that generates personalized, deadline-aware study schedules based on user task inputs and preparation timelines.
- Applied rule-based NLP logic to parse user goals and produce adaptive, prioritized study plans.

Cross-Database Table Transfer GUI Tool (Python, Tkinter, MySQL, PostgreSQL, Oracle)

[Git link](#)

- Designed and implemented a data migration pipeline supporting schema mapping, data transformation, and cross-database transfer.
- Built robust error handling and structured logging to ensure data integrity throughout the ETL process.

SKILLS

- Languages:** Python, Java, JavaScript
- Frameworks:** Flask, Django
- Databases:** MySQL, PostgreSQL
- Core CS:** Data Structures, Algorithms, OOP, DBMS
- Tools:** Git, GitHub, REST APIs

CERTIFICATIONS

- [Python Essentials 1](#) - Cisco
- [Database Management System](#) – NPTEL
- [SQL \(Basic\)](#) – HackerRank
- [Introduction to SQL](#) – Simplilearn
- [Python Programming - 01](#) – Infosys Springboard
- [Python: Your First Step Toward Data Science](#) – Infosys Springboard

ACHIEVEMENTS

- Top 10, HackV'25 Hackathon** — Ranked among 100+ teams in a national-level hackathon
- Co-Founder, Nexus Club** — Led workshops on development and DevOps practices
- Hackathon Organizer, HackVibe & VHack 2.0** — Managed event execution, team coordination, and participant operations
- Coding Contest Lead, HackerRank** — Conducted 2 coding contests to promote problem-solving skills
- Gold & Bronze Medalist, National Taekwondo Championship** — Secured national-level medals in competitive Taekwondo
